

Adding a Register Online Button

All major events pages on regional websites have the ability to have a “Register Online” button. Clicking on this button will open a pop-up where swimmers can click through to enter into the meet.

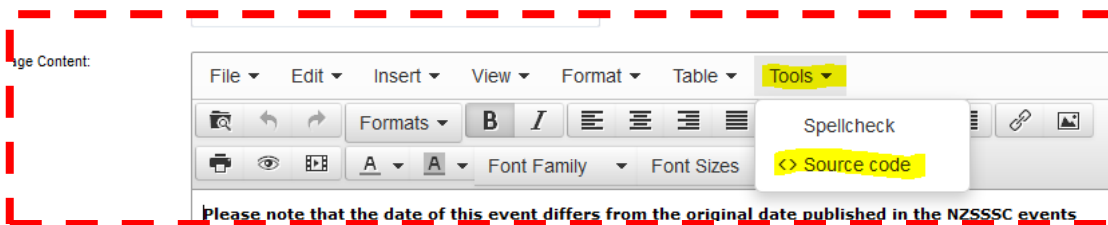

1

When in the major events page in the visage CMS, click on the “Edit Event Homepage Content button” this can be found underneath the banner.

2

Once in here click on the Tools tab and then click into the “Source Code” sub-tab.

3

If you haven't added any content to that page yet a blank page will appear. If you have added content to this page already then you will need to copy the following piece of code underneath all of the other code that is already there.

```
<div aptwidgettype="include"
workflow="PUBLIC.EVENT.DETAILS.BUTTON&amp;meetID=000749&amp;buttonText=Register Online" class="eventsInclude"></div>

<div style="clear: both;"></div>
```

To link the page to the database to allow entries to the correct meet you will have to change the meet code to match that of the meet in the database. The meet code in the above piece of code is highlighted in green. The meet code can be found in the “Main Details” section of the meet in the database.
